

Full Database Render Test

This document renders every node to ensure no runtime errors.

1. Definitions

def-seq-limit: Limit of a sequence

def-cauchy: Cauchy Sequence

def-bounded: Bounded Sequence

2. Tools (Theorems)

tool-tri-ineq: Triangle Inequality

tool-bw: Bolzano-Weierstrass Theorem

3. Examples

ex-harmonic: Harmonic Series

ex-alt-harmonic: Alternating Harmonic Series

ex-dirichlet: Dirichlet Function

4. Mistakes

err-sign: ⚠ Sign Error

err-circular: ⚠ Circular Reasoning

5. Questions

Rendering qn-limit-proof:

Limits

2023 | Dr. Smith

Given:

Let $x_n = (3n+1)/(n-2)$.

To Prove:

Prove that $\lim(x_n) = 3$.

Hint: Use the definition of convergence.

Official Solution:

Scratch Work (Proof)

Find N such that $|x_n - 3| < \epsilon$.
